

Golf Cart Information Sheet

- Cart charger needs to be kept out of the weather and off of the beach at all times. It is recommended that the charger be left at the residence while operating cart.
- Key must be removed from cart anytime it is left unattended.
- Charger is "automatic" and will shut off automatically when cart is fully charged. Large grey end of charger plugs into cart at the drivers side of the cart just below the operator and will only fit one way. The power cord end requires 110v service only with a recommended 20 amp circuit. It is your responsibility to ensure that receptacles with adequate power are available to charge the cart.
- Some of our Electric Carts are equipped with a battery light indicating when the batteries are getting low. When the light comes on, the cart will need to be plugged into the charger. It is recommended the Cart is placed on charge anytime not in use or at a minimum charged every night regardless of the battery condition. This will insure you get the most out of the cart for the duration of your rental. Keep in mind, electric carts **cannot and are not designed to run continuously** without charging the batteries. Run times will do vary and will be shortened if cart is driven in loose sand or when carrying 4 passengers.
- **DO NOT OPERATE Cart In The Surf.** Doing so will result in the loss of the use of the cart and your security deposit at a minimum, no exceptions!
- At no time should there be more than 4 passengers on the cart. Allowing more than 4 passengers on the cart will result suspension damage and repair cost will be charged against your deposit.
- Do not make turns at high speeds. Slow down to turn or make corners especially with carts that have altered suspensions "Lift Kits" as they are prone to rollover at high speeds.
- It is our goal to provide customer's with reliable golf carts by which we perform routine maintenance and battery discharge tests. This is to ensure you get the most use out of the cart with each charge. In the event a problem does arise we ask that you first check to ensure that all operating instructions are being followed and the charger has sufficient power and is connected properly. Do not for any reason attempt to perform maintenance or repairs on cart. If you are unable to resolve the problem, contact Gulf Coast Golf Carts immediately and we will out a mechanic as soon as possible. Should the problem result in the loss of use during the agreed upon rental time, you will be refunded appropriately. Failure to notify us of a problem will result in no refund for that period of time we were not notified of the problem. In the event we are requested to make a service call and it is determined that the problem is the result of improper operation of the cart or failure to properly connect the charging system a \$25.00 fee will be charged against your deposit.
- When renting a gas cart, only clean fresh unleaded gas must be used.
- Upon completion of rental, cart should be washed off thoroughly. Do not use a pressure washer, water hose will be sufficient. Make sure that the charger does not get wet, and that the entire cart is rinsed, including the battery compartment and the undercarriage. "Note" Failure to wash the cart at the completion of rental period will result in a \$15.00 cleaning fee that will be charged against your deposit.
- Our carts are inspected for damage at the point of delivery and pickup. In the event the cart is damaged during the rental period an estimated repair cost will be charged against your deposit.
- Contact Number is **409-296-6980**
